

## Post translational modifications in cell signaling, development and disease

Graduate course organized by: Lucio Conti, Ignacio Ezquer, Marta Mendes, Thomas Vaccari

---

### Tuesday September 24th - AULA B8

9.30 Laura Fioriti (Mario Negri, Milan)

*“Protein SUMOylation modification and its associations with disease”*

10.45 Sara Sigismund (IEO, Milan)

*“Post-translational modifications in EGFR endocytosis and signaling”*

12.00 Giovanna Serino (Università La Sapienza, Roma)

*“The ubiquitin proteasome pathway in the environmental control of plant growth and development”*

Buffet lunch for students and speakers (Orto Botanico - via Camillo Golgi, 18)

### Thursday September 26th - AULA B8

14.00 Ari Sadanandom (University of Durham, UK)

*“SUMO and plant stress responses”*

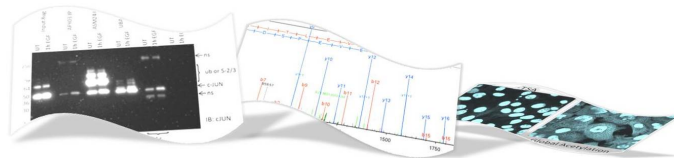

15.15 Simona Polo (IFOM, Milan)

*“HECT E3 Ligases: A Tale With Multiple Facets”*

16.30 Giannino del Sal (Università di Trieste)

*“Function and dysfunction of Pin1 in regulating proline-directed phosphorylation signalling”*

Aperitivo for students and speakers (Orto Botanico - via Camillo Golgi, 18)

Attendance is open to the UNIMI scientific community. DBS members are warmly welcome to attend.
